

Dear Rally Enthusiast,

If you would like to have your rally vehicle—motorcycle, quad bike, buggy, SSV, or 4x4—transported from the Netherlands or neighbouring countries, we can arrange this for you.

We have several years of experience in exporting and importing motor vehicles and related equipment. We take care of customs clearance for you and your rally vehicle will arrive at the bivouac well in advance.

You can also use our lockable truck to store your spare parts and tools during the event and at night.

If you would like to use our services, please contact me.

**You can do so via info@rallylogix.com
Or by telephone and WhatsApp +31653527753
www.rallylogix.com**

We are in contact with the organisation and will verify everything so that you have no worries and can start the Rally relaxed.

Kind regards,

Bas van der Steen
